

CASE STUDY: FAIRLORRY

# From 2-Day Manual Matching to Real-Time Reconciliation.

How AldaptIQ by Number7 AI eliminated manual LR matching and recovered lost revenue for India's leading trucking platform.

**Number7 AI**  
number7ai.com

**80%**

MATCHING TIME SAVED

**3-5%**

BILLING LEAKAGE RECOVERED

**< 2 Weeks**

DEPLOYMENT TIME

# This Was the Ceiling at Fairlorry

**7:00 AM**

Hundreds of LRs arrive from transporters. Every format, every route, every weight discrepancy.

**9:30 AM**

Clerks begin manually matching each LR to invoices. Origin, weight, vehicle — checked by hand.

**2:00 PM**

Damage claims surface on paper LRs. Financial impact? Unknown until someone manually calculates.

**5:00 PM**

Debit/Credit notes drafted manually. GST compliance checked by accountants. Cycle repeats in 2-3 days.

**Trucking platforms lose 3-5% of revenue to reconciliation errors and delays.**

# The 4-Module Intelligence Layer

AldaptIQ built a custom engine on top of Fairlorry's TMS.

## MODULE 01

### LR-Invoice Matching

Auto-checks origin, weight, vehicle, and freight rates between LR and Invoice.

✓ **100% FASTER RECONCILIATION.**

## MODULE 02

### LR State Tracking

Auto-detects 'Plain' vs 'Acknowledged' status from digital Proof of Delivery.

✓ **ZERO MISSED PODS.**

## MODULE 03

### Damage Identification

Captures damage remarks and calculates item-level financial value automatically.

✓ **REAL-TIME CLAIM VISIBILITY.**

## MODULE 04

### Auto Note Generation

Instantly issues GST-compliant Debit/Credit notes based on reconciliation data.

✓ **DISPUTES RESOLVED IN HOURS.**

**FROM DAYS TO REAL-TIME. ZERO MANUAL RECONCILIATION.**

# Now Flip the Numbers

Same freight volume. Two different operational models.

## LR MATCHING

2-3 days manual

**Real-time auto**

⚡ 80% TIME SAVED

## POD TRACKING

Phone calls + email

**Auto-status flag**

⚡ ZERO MISSED PODS

## DAMAGE CLAIMS

Days to quantify

**Instant calculation**

⚡ REAL-TIME VISIBILITY

## DEBIT/CREDIT NOTES

Manual GST drafts

**System generated**

⚡ 100% GST COMPLIANT

“AldaptIQ built the complete reconciliation intelligence layer for our platform. What took days now happens instantly.”

— FAIRLORRY TECH SOLUTIONS PVT. LTD.

# Impact: Manual vs. Automated

From spreadsheet chaos to real-time financial accuracy.

Workflow	Before AldaptIQ	After AldaptIQ
LR Matching	Manual, 2-3 days	<b>Automated, Real-time</b>
POD Tracking	Manual phone calls	<b>Auto-Status Flag</b>
Debit/Credit Notes	Manually drafted	<b>System Generated</b>
Accounts Integration	Manual journal entries	<b>Auto-posted</b>

“AldaptIQ built the complete reconciliation intelligence layer for our platform. What took days now happens instantly.”

— FAIRLORRY TECH SOLUTIONS PVT. LTD.

# The Exception Management Workflow

Your team only handles exceptions. Everything else is automated.

## Auto-Matched (Green)

LR matches invoice perfectly. Origin, weight, vehicle, rate — all verified. POD confirmed. Note auto-generated. No human touch.

## Review Required (Amber)

Weight or rate mismatch detected. System flags the discrepancy and routes to reconciliation clerk for one-time approval.

## Flagged Error (Red)

Damage detected on POD. Duplicate LR. Missing acknowledgement. System blocks invoicing and generates a claim report.

**HIGH ACCURACY MAKES HIGH AUTOMATION POSSIBLE.**

# Send Us 100 LRs.

We'll show you exactly where your reconciliation process is losing time and money.
