The Growth Blocker at JSK

9:00 AM

Dozens of Purchase Orders arrive via WhatsApp, Email, and Scanned PDFs from factories across Gujarat.

10:30 AM

Staff begins manual lookup of complex SKUs—Delta VFDs, Siemens PLCs, Sick Sensors. Every model number is a typo risk.

2:15 PM

Entry is slow. Pricing and stock checks are delayed while data is still being re-typed into the internal system.

5:00 PM

Backlog grows. Scalability is tied to headcount. More orders mean more data entry operators, not more sales.

!

Manual entry wasn't just slow; it was a **'ceiling'** on JSK's ability to serve more OEMs.

The Intelligent Ingestion Layer

AldaptIQ built the 'front door' for JSK's document workflow.

MODULE 01

Universal Ingestion

Monitors WhatsApp,
Email, and Scans.
Captures every PO the
moment it arrives.

**⚡ ZERO DOCUMENT
LOSS**

MODULE 02

Intelligent Parsing

Extracts PO#, Qty, Price,
and part numbers from
any visual format (even
photos).

⚡ NEAR-ZERO ERRORS

MODULE 03

SKU Mapping

Automatically maps
model numbers to JSK's
product catalog (Delta,
Panasonic, Sick).

**⚡ NO MANUAL
LOOKUPS**

MODULE 04

Workflow Handoff

Pushes structured data to
JSK's internal system.
Records are pre-
populated for review.

⚡ 10X FASTER INTAKE

Now Flip the Numbers

Transforming JSK's back-office economics.

PO ENTRY

Manual re-typing

Auto-created

⚡ **ZERO MANUAL ENTRY**

QUOTATION LOGGING

Hours per batch

Instant / Real-time

⚡ **MINUTES, NOT HOURS**

ERROR RATE

Manual typos

AI Validated

⚡ **NEAR-ZERO ERRORS**

SCALABILITY

Hire per order growth

Software-Elastic

⚡ **NO HIRING NEEDED**

“Our team stopped being data entry operators and started being sales closers. Every PO now goes straight into our system.”
